

TEMCO Bank Partners with Leading Educational Institutions to Launch Foundation for Innovative Degree Program

December 24, 2024 - Colombo, Sri Lanka

TEMCO Bank (Technology Entrepreneurship and Management Cooperative Development Banking Society Ltd) has entered into a groundbreaking partnership with several prestigious institutions to establish a comprehensive 4-year Software Engineering Degree

program. The Memorandum of Understanding (MOU) was signed at a ceremony attended by key stakeholders from all participating organizations.

The collaboration brings together Java Institute Holdings (Pvt) Ltd, Sheffield International Institute (Pvt) Ltd, and Charles Housing and Property Developers (Pvt) Ltd in a strategic alliance aimed at providing quality higher education opportunities for Sri Lankan students.

The signing ceremony was attended by distinguished representatives including TEMCO Bank Chairman Dr. Ishantha Siribaddana, Secretary Mr. Gamini Dahanayaka, and Treasurer Mr. Punyasoma Wewalage. Also present were Sheffield International Institute Chairperson Mrs.

Nilmini Dissanayaka, Java Institute Holdings CEO Mr. Tissa Abeywickrema, along with Mr. Oshadha Dissanayake and Mr. Kosala Dissanayake representing Sheffield and Charles Holdings.

Under this partnership, TEMCO Bank will provide comprehensive financial assistance to eligible students enrolled at Sheffield International Institute. The program features a unique two-stage structure, with initial

foundation levels completed prior to Ordinary Level examinations and remaining coursework conducted afterward.

"This partnership represents a significant step forward in making quality higher education more accessible to Sri Lankan students," said Dr. Ishantha Siribaddana, Chairman of TEMCO Bank.

"By providing financial assistance through loans at a 6% interest rate with a repayment period of up to 10 years, scholarships, and grants, we're removing barriers to education and investing in our nation's future."

The program will utilize both online and physical facilities provided by Java Institute for Advanced Technology, with Charles Holdings offering additional building facilities as needed. This initiative aligns with TEMCO Bank's commitment to fostering educational development and supporting technological advancement in Sri Lanka. The program is expected to commence operations following the successful registration of the Joint Venture Company.

The Software Engineering degree program operates under a comprehensive regulatory and quality assurance framework, including:

- BEng (Hons) Software Engineering in partnership with IIC University of Technology
- Approved and registered by the Tertiary and Vocational Education Commission (TVEC) of Sri Lanka
- Birmingham City University partnership for BSc (Hons) Software Engineering Top-Up program
- Three Software Engineering Courses are conducted offered by OFQUAL (The Office of Qualifications and Examinations Regulation, UK)
- Operating under UK Government educational standards under the governance of UK Awards and Skills Education Group.

This multi-tiered accreditation and governance structure ensures the program delivers internationally recognized qualifications while maintaining compliance with both Sri Lankan and British educational standards. Students benefit from a globally benchmarked curriculum that meets rigorous quality assurance requirements.
